Specification of *aclk_event_log_t* (ACLK Event)

32	24	16	8	0	
Event Group		Reserved	Reserved Bitfield	Error	} Higher 32 bits
User Group		Event ID			} Lower 32 bits
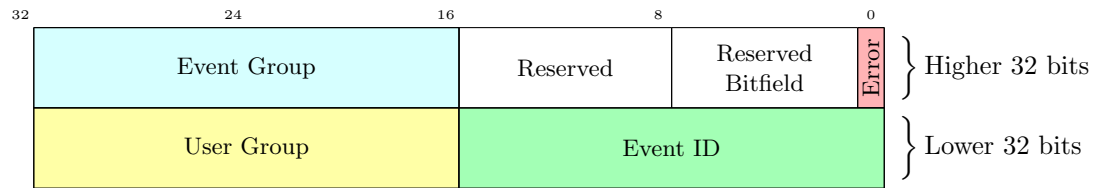

1 Descriptions of the fields

- **Event Group** - Logical Grouping of events related to similar topic/area.

- **Reserved (Res. Bitfield)** - Reserved for future use.

- **Error** - If set this event is Error instead of information / regular event.

- **User Group** - Some submodules like *mqtt_websockets* might want to group events originating from them in their own logical subgroups. This allows for such use case. Currently unused but that will change.
